

Two Pieces of Heavy Machinery Arsoned on the Property of Ray-Mont Logistics

Anonymous submission to MTL Counter-info – August 2021

Mr. Raymond,

We recently learned that you qualified for a Quebec government subsidy in the amount of \$580,000 for your contribution to fighting climate change. Congratulations! We thought that we should do our part as well. So we decided to lighten the load of your heavy machinery by grilling up two of your expensive toys. On the night of August 25th – 26th, we set fire to a mechanical digger and a bulldozer under the sleepy eyes of the night watchman.

It's time for you to leave the poplar trees and the fish alone. Take a bit of time for yourself, at the chalet or by the ocean. Maybe a stroll through the forest will make you realize that there is no semblance of life in your concrete.

Evidently, the tireless workhorse that you are is not greatly affected by the loss of a couple machines. We see that the work is carrying on regardless. You are making a mistake. Construction must stop immediately, and we will put ourselves to this task tooth and nail, whatever it takes. May the invitation be heard for a hot fall!

See you again very soon.
